

Becoming a Citizen Developer with Power Platform

18 May 2026 | 16:00–21:00 BST

Live online masterclass | 5 hours | 5 CPD points

Presented at the Global Excel Summit 2026

You know Excel. But you keep hitting the same ceiling.

-
- Copying data between apps manually
 - Emailing reports nobody can maintain
 - Building dashboards that break next month
 - Fielding the same questions about your data

Power Platform was built to close this gap.

What You'll Build

1 Power Automate

- Trigger workflows directly from Excel tables
- Automate Teams & Outlook notifications
- Use Office Scripts for dynamic data processing

2 Power BI

- Connect Excel workbooks to Power BI Desktop
- Build compelling interactive visuals
- Publish and share reports across your org

What You'll Build

3 Power Apps

- Turn Excel lists into mobile-ready forms
- Learn how Dataverse fits into Power Platform
- Build a team expense tracker app

4 Copilot Studio

- Understand intents, entities, and variables
- Connect bots to Excel or Power Automate flows
- Build an "Ask Excel" chatbot for your data

What's Included

5 hours of live, hands-on instruction

All files — slide deck, workbooks, and exercises

Recording — full session replay to revisit anytime

Certificate of attendance with 5 CPD hours

Use code `GEORGE10` for 10% off
